

Peer Review

Peer review is defined as “a process by which a scholarly work (such as a paper or research proposal) is checked by a group of experts in the same field to make sure it meets the necessary standards before it is published or accepted (Merriam-Webster online, 2015).

The peer reviewers for SDSU Extension Beef: Best Management Practices for Cow-Calf Production, have helped make it a reputable book that will be useful to producers, students and other professionals. Their thoughtful comments and suggestions have made the content stronger, by providing additional supporting research and applications for producers. We are indebted to this prestigious list of cow-calf experts for their contributions.

Dr. Dale Grotelueschen, Professor and Director, Great Plains Veterinary Educational Center, University of Nebraska

Dr. Keith Harmony, Professor and Range Scientist, Kansas State University Agricultural Research Center, Hays

Dr. Britt Hicks, Area Extension Livestock Specialist, Oklahoma Panhandle Research and Extension Center, Oklahoma State University
